

Yang (Tianyang) Bao (She/her/hers)

1(619) 548 2919 | tyangbao1@gmail.com | [GitHub](#)

Data-driven individual on the analytical side of Investment Engineering team which continuously builds systematic approaches to process data and generate materials. I currently lead on establishing an automated inquiry intake workflow to replace human monitoring while actively exploring various interpretations of portfolio performance, equity and fixed income. I have extensive experience of addressing diverse requests (bespoke data analysis, recurring reports, and external data delivery) under tight timelines with outstanding organizational skills. I reckon that better allocation of human attention and action-based structures can improve efficiency in multiple dimensions; I am inspired to evolve such principles in any and more environment.

SKILLS AND INDEPENDENT LEARNINGS

Skills: Python, SQL, GitHub, large-scale data wrangling, Microsoft PowerApps & Automate

Communication: English (fluent), Mandarin Chinese (fluent)

Interests: [solidcore], Chinese & Russian literature, beer passport

Visa Status: H-1B status activated in October 2025

EXPERIENCE

DATA ANALYST, INVESTMENT ENGINEERING

Austin, TX

Dimensional Fund Advisors

Feb. 2024 – Present

Portfolio and Financial Data Analysis (Primary Contributor)

- Comprehensive experience to perform and communicate portfolio attributions analysis to address client questions
- Scope of analysis extends from returns-based attributions and holdings-based allocation to benchmark comparison

Automated Inquiry Intake Workflow (Primary Lead)

Provided primary and timely handling of firm-wide data requests, used end-to-end and cross-department visibility to identify manual handoff delays

- Enabled team to reallocate 30% daily attention, leveraging automated ticket system, that were lost to feedback sync
- Documented requester-to-administrator interaction flow to improve bottlenecks identified and pipeline performance

Data Configuration Platform (Contributor)

Automated Marketing materials and recurring reports to reduce delivery from 4 hours to 30 minutes and optimize query performance by ~30%

- Contributed to establish data platform hosting configuration parameters for cross-team infrastructure integration
- Collaborated on Python validation tasks to compare up and downstream outputs to identify mismatching format design

ALPHA INFRASTRUCTURE AND SYNERGY, CO-OP

Boston, MA

State Street Corp.

Jan. 2020 – Jun. 2020

- Generated Tableau visuals to identify synergy opportunities by analyzing resource allocation for 107 firmwide projects
- Coordinated onboarding and technical workflow on topics of data structure and data migration

EDUCATION

MASTER OF SCIENCE IN FINANCIAL MATHEMATICS

Chicago, IL

The University of Chicago

Dec. 2023

Relevant Coursework: Option Pricing, Time Series Forecasting, Mathematical Market Microstructure: An Optimized Approach

BACHELOR OF SCIENCE IN MATHEMATICS AND FINANCE, MINOR IN DATA SCIENCE

Boston, MA

Northeastern University

May 2022

Relevant Coursework: Statistics & Stochastic Process, Probability & Risks, Machine Learning in Finance, Journalism

Awards: Cum Laude Graduates, Dean's list

INSTRUCTOR RESPONSIBILITIES AND EXTRA-CURR.

INSTRUCTOR

Virtual

Math Kangaroo

Sept. 2024 – Present

- Actively teaching Grade 3-4 students in competition-oriented Math in Algebra, Geometry and Logical Reasonings

PRESIDENT, GLOBAL CHINA CONNECTION

Boston, MA

Northeastern University

Aug. 2020 – May 2022

- Hosted innovative panel for industry insights and networking featuring C-suites from Carlyle Group and State Street
